

AMENDMENTS

In the Claims

The following is a marked-up version of the claims with the language that is underlined (“ ”) being added and the language that contains strikethrough (“~~—~~”) being deleted:

1. – 8. (Canceled)

9. (Currently Amended) A print system comprising:

a printing device having a first print cartridge and an identification reader, the first print cartridge containing a print substance for printing on a print medium, the first cartridge having a transmitter readable identification tag for providing first information, the identification reader being configured to receive the first information from the identification tag, such that, if the first information corresponds to the printing device, the identification reader enables the printing device to print; ~~[[and]]~~

a print authorization system communicating with the printing device, the print authorization system being configured to receive, via a communication network, information to be printed and second information corresponding to a user, said print authorization system being further configured to receive third information corresponding to a user via the identification reader such that, if the third information corresponds to the second information, the print authorization system enables the printing device to print the information to be printed; and

a user identification tag adapted to communicate with the identification reader via wireless communication, the identification tag including a memory, the memory storing data

corresponding to the third information, the user identification tag being adapted to provide the third information to the identification reader.

10. (Original) The print system of claim 9, wherein the identification reader includes a receiver, the receiver being adapted to receive the first and third information via wireless communication.

11. (Original) The print system of claim 9, wherein the identification reader includes means for receiving information via wireless communication.

12. (Canceled).

13. (Previously Presented) The print system of claim 9, further comprising:

a second print cartridge having a print substance for printing on a print medium and a readable identification tag for providing the first information, the second print cartridge being adapted to be installed in the printing device after the first print cartridge is removed from the printing device.

14. (Original) The print system of claim 9, wherein the print authorization system is a print-end print authorization system implemented by the printing device; and

further comprising:

a user-end print authorization system adapted to communicate with the printing device, the user-end print authorization system being configured to enable a user to provide the second information to the print-end print authorization system via a communication network.

15. (Original) The print system of claim 14, wherein the user-end print authorization system is adapted to provide a user interface, the user interface enabling a user to designate information to be printed and select a secure-enable mode such that, when the user selects the secure-enable mode, the information to be printed can only be printed by the printing device while the identification reader receives the third information.

16. (Original) The print system of claim 9, wherein the printing device includes memory, the printing device being configured to store the information to be printed and the first information in the memory at a time after receipt, the printing device being further configured to render the information to be printed inaccessible from the memory at a time after printing.

17. - 22. (Canceled)

23. (Previously Presented) The print system of claim 9, wherein the print authorization system is further configured to enable printing of the information to be printed if receipt of the third information is not interrupted during printing of the information to be printed, such that, if receipt of the third information during printing is interrupted, the printing of the information to be printed is discontinued.
